Good Afternoon Hanh,

Jacobs will be conducting sediment sampling on behalf of Escopeta Oil under the general NPDES permit AKG-31-5000 in Cook Inlet. Included in Escopeta's Environmental Monitoring Plan, Attachment 3 to the NPDES Notice of Intent dated April 28 2011, are conflicting references for the testing of Polycyclic Aromatic Hydrocarbons (PAHs).

Jacobs would like to clarify that the SW8270D (SIM) method will be used to determine PAH concentration in sediment samples.

Please let me know if you have any questions regarding this matter.

Thank you
